Message from the Guest Editors

Cereals are affected by various viruses, which are the most difficult pathogens to control since once a viral disease has established on a field, there are no means by which it can be eradicated. Many countries are addressing this challenge and are making important contributions to virology research over the years. Looking for high-quality science developed in the face of unique challenges, we encourage researchers to submit articles to this Special Issue entitled “State-of-the-Art Cereal Virus Diseases in Asian and European Countries.”

This Special Issue’s goal is to publish research studies that address efforts for cereal virus diagnosis, diversity of virus population, host resistance, transmission, prevention and control in Asian and European countries. Investigations on pathogenesis of virus infection are also welcome, as well as relevant epidemiological findings. Both original manuscripts and reviews are welcome.

Deadline for manuscript submissions:

closed (31 March 2022)

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
