Message from the Collection Editor

Dear Colleagues,

In this Topical Collection of *Viruses*, we offer a platform to submit original research articles on the very latest themes in virology. In particular, we encourage submissions concerning recently identified strains with the potential to pose a widespread threat to animals, crops, or public health. With a rapid publication time of 40 days, *Viruses* is uniquely poised for the rapid dissemination of such knowledge.

Eric O. Freed

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the **Science Citation Index Expanded** (Web of Science), **MEDLINE** (PubMed) and other databases. Full-text available in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.4 days after submission; acceptance to publication is undertaken in 4.1 days (median values for papers published in this journal in the second half of 2018).
