Message from the Guest Editors

Dear Colleagues,

Emerging viruses represent a major concern for public health offices. Climate changes, the international migration of people and products, deforestation, and other anthropogenic activities (and their consequences) seem to be closely related to the emerging of new viruses, triggering an increasing number of notified outbreaks, epidemics, and pandemics.

In this Special Issue, we encourage colleagues to submit manuscripts related to the surveillance, detection, and evolution of emerging viruses, describing from local outbreaks to worldwide viral pandemics. We also welcome manuscripts describing new methods and technologies adapted or created for the study, prevention, and control of emerging viruses. The goal of this Special Issue of *Viruses* is to serve as a collection of the current knowledge on a broad range of emerging human, animal, and plant viral diseases. Both original manuscripts and reviews are welcome.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, and **other databases**.

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
