Message from the Guest Editors

Dear Colleagues,

Emerging viruses represent a major concern for public health offices. Climate changes, the international migration of people and products, deforestation, and other anthropogenic activities (and their consequences) seem to be closely related to the emerging of new viruses, triggering an increasing number of notified outbreaks, epidemics, and pandemics.

In this Special Issue, we encourage colleagues to submit manuscripts related to the surveillance, detection, and evolution of emerging viruses, describing from local outbreaks to worldwide viral pandemics. We also welcome manuscripts describing new methods and technologies adapted or created for the study, prevention, and control of emerging viruses. The goal of this Special Issue of *Viruses* is to serve as a collection of the current knowledge on a broad range of emerging human, animal, and plant viral diseases. Both original manuscripts and reviews are welcome.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
