submissions:

closed (31 March 2021)

Message from the Guest Editor

Particularly welcome are articles that describe:

- The epidemiology of arbovirus infections in different regions of the world
 - arbovirus infections in the Americas (past and present)
 - arbovirus infections in Europe (past and present)
 - arbovirus infections in Africa (past and present)
 - arbovirus infections in Asia (past and present)
 - arbovirus infections in Oceania (past and present)
- Clinical manifestations and complications of arbovirus infections
 - neurological complications
 - materno-fetal complications
- Transmission of arbovirus infections
 - vectorial transmission
 - non-vectorial transmission (blood borne, materno-fetal, sexual)
- Current state of and latest developments in the diagnosis of arbovirus infections
- arboviruses with limited circulation but that have the potential to emerge on a larger scale, such as Mayaro, Ross River, Oropuche, Venezuelan equine, Rift Valley Fever, Usutu, O’Nyong Nyong, and other lesser known viruses.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
