Message from the Collection Editor

Dear Colleagues,

Filoviruses (cuevaviruses, ebolaviruses, and marburgviruses) are exotic high-consequence human and animal pathogens that must be handled in maximum (biosafety level 4) containment. This topic collection aims at providing an opportunity for filovirologists and other experts to publish not only general articles or reviews on any filovirus research topic, but also to distribute announcements of committee discussions or decisions, meeting reports, facility or method descriptions, and personal viewpoints or hypotheses. The goal of this open access topic collection is to further communication among interested scientists with particular emphasis on providing citable information on thoughts or ideas generally “known in the community” that are yet unpublished.

Sincerely,
Jens H. Kuhn

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, and **other databases**.

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
