Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to explore different research areas and to collect articles that focus on infectious disease epidemiology and transmission dynamics. Furthermore, we expect to gain more insight into the applications of such approaches in various areas such as public health, health economics, health informatics, evolution, immunity, and medical affairs. Areas of interest include but are not limited to the following topics:

1. Infectious disease epidemiology and transmission dynamics;
2. Spatial and temporal transmission patterns of infectious diseases;
3. Effects of pharmaceutical interventions such as mass testing, vaccines, or antivirals;
4. Inference of key epidemiological parameters;
5. Health economics;
6. Phylogenetics and phylodynamics;
7. Seroepidemiology;
8. User-centered design of visual analytics systems for infectious disease epidemiology and transmission dynamics to facilitate the gaining of insight, decision-making, or predictive analysis.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
