Message from the Guest Editor

Dear Colleagues,

Influenza virus is a significant zoonotic pathogen that is widely distributed throughout China, posing a significant threat to domestic poultry farms and public health. In this Special Issue, we aim to assemble a collection of research papers that highlight the state-of-the-art influenza research in China. Within the issue, we would like to focus on epidemiology, transmission, the development of novel diagnostic assays, the development of vaccines, and the biology and molecular pathogenesis of the virus. Of particular interest are the transmission of the virus via wild birds, the interplay between the virus and host immune responses, and the innate immune pathways modulated by the virus. We welcome original research articles and comprehensive reviews across a broad range of topics on influenza virus.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
