### Message from the Guest Editors

Dear Colleagues,

The research effort, publication rate and scientific community within the field of marine viruses have been growing rapidly the past decade and viruses are now known to play key roles in microbial population dynamics, diversity and evolution as well as biogeochemical cycling.

The aim of this special issue is to highlight the progress in our understanding of the role of viruses in the marine environment by presenting novel research on the ecology, distribution and diversity of marine viruses and the influence of virus-host interactions on e.g. mortality, element cycling and evolution of marine microbial communities.

Prof. Mathias Middelboe

Prof. Dr. Corina:P.D. Brussaard

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the **Science Citation Index Expanded** (Web of Science), **MEDLINE** (PubMed) and other databases. Full-text available in PubMed Central.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 15.4 days after submission; acceptance to publication is undertaken in 4.1 days (median values for papers published in this journal in the second half of 2018).
