Biotechnology, University of  
Bologna, Bologna, Italy

Deadline for manuscript  
submissions:

**closed (30 June 2021)**

### Message from the Guest Editor

This Special Issue on ‘Advances in Parvovirus Research 2020’ is associated to the conference “XVIII International Parvovirus Workshop”, meant to take place in Rimini, Italy, in June 2021. The international workshops dedicated to parvoviruses, first held in 1985, are events strictly centred on all aspects of parvovirus research and provide excellent opportunities to focus the research topics in this area.

The aim of this Special Issue of *Viruses* is to offer an opportunity to collect the newest contributions in the field of parvovirus research. Evolution, structural biology, viral replication, virus–host interaction, pathogenesis and immunity, clinical virology of medical and veterinarian relevance, gene therapy, and viral oncotherapy are a selection of the topics that will be addressed during the conference, as well as being of general interest to a wider audience.

Symposium participants, as well as all researchers working in the field, are cordially invited to contribute original research papers or propose reviews to this Special Issue of *Viruses*.

an Open Access Journal by MDPI

## Editor-in-Chief

Director, HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
