### Message from the Guest Editors

The reality of the risk is highlighted by recent outbreaks of *Tobamovirus* and *Pospiviroid* species in solanaceous and cucurbit crops globally, where the virus and viroid species were not previously known. Methods to control the risk can include the disinfection of seed, controlling for disease during seed production, seed health testing for certification, and breeding for resistance.

This Special Issue will feature research papers that contribute to an improved understanding of the ecology and risk of seed-borne and seed-transmissible viruses and viroids, including those that occur in fruits and vegetables, grains and pulses, ornamental and fodder crop seeds. Studies that pertain to any aspect of seed-borne or seed-transmitted viruses or viroids are welcome, including quantitative and qualitative studies of how they contaminate or infect seed, attributes of specific relationships and interactions between hosts and pathogens that affect seed contamination and transmission, the mode and rate of transmission, effective control strategies, diagnostic testing and the science underpinning regulatory measures.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

**Journal Rank:** JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
