## Subviral RNAs

Guest Editor:

Deadline for manuscript  
submissions:  
**closed (15 August 2009)**

### Message from the Guest Editor

Dear Colleagues,

Viroids, hepatitis delta virus, satellite RNAs/viruses and defective interfering RNAs are unique RNAs that are not only exciting as pathogens but also as models for basic biology. This special issue will present the latest advances on these subviral RNAs through research articles as well as invited reviews from world leading experts. This issue should be valuable for research and teaching purposes.

Prof. Dr. Biao Ding

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
