Message from the Guest Editors

Dear Colleagues,

Over recent decades, intensive animal production (especially pig, poultry, cattle, etc.) has been developed rapidly. Infectious disease, especially viral diseases, have posed adverse impacts on the healthy development of animal husbandry. Chinese veterinarians and researchers consistently struggle with several emerging and reemerging viruses which are important to animal health. Fortunately, tremendous strides have been made by Chinese virologists in different areas of animal viral diseases, promoting the prevention and control of such diseases.

In this Special Issue, we will focus on state-of-the-art veterinary virology research in China. Animal species to be discussed include, but are not limited to pigs, poultry, cattle, small ruminants, pets and economic animals. We invite you to submit your most recent research findings and/or insights into this topic. We welcome reviews and original research articles focused on the following topics: Emerging and re-emerging viruses; Epidemiology; Pathogenesis; Diagnostics; Virus evolution; Virus-host interactions; Prophylaxis and prevention; Vaccines; Antivirals; Viral immunology and Viral structure.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
