

Voyages through the Multiple Scales of Virus Biology

Guest Editor:

Dr. Fasséli Coulibaly

Department of Biochemistry & Molecular Biology, Infection & Immunity program, Biomedicine Discovery Institute, Monash University, Melbourne, Australia

Deadline for manuscript submissions:
closed (31 May 2021)

Message from the Guest Editor

Viruses are only truly active when they interact with and infect a cell. As a consequence, a key pursuit of **Molecular and Structural Virology** has been to provide a molecular understanding of viral processes in the context of the cellular environment. Exciting methodological developments have made significant headway in this direction allowing the *in situ* analysis of native viral components with high spatiotemporal resolution.

To reflect these advances, the journal *Viruses* has designed a special issue accepting contributions with an emphasis on biophysics, imaging and structural biology, and their integration to provide a view of the virus world at multiple scales.

Not unlike J. Swift's character Gulliver, we invite contributions that feature viruses either as giant molecular machines achieving biochemical wonders or as masterful dwarfs in the vast environment of the cell, and perhaps both at the same time.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
