Dr. Serafeim Chaintoutis

Diagnostic Laboratory, School of Veterinary Medicine, Faculty of Health Sciences, Aristotle University of Thessaloniki, 54627 Thessaloniki, Greece

Deadline for manuscript submissions:

closed (31 October 2022)

Message from the Guest Editors

Dear Colleagues,

The Coronavirus pandemic, in conjunction with the recent advances in technology, boosted virus research in Greece, as worldwide. Existing state-of-the art research on viruses affecting humans, animals, plants and microorganisms joint forces in 2020 with a variety of other biomedical or non-biomedical disciplines as a response to the SARS-Cov-2 pandemic. New technologies and needs in the study of endemic and emerging infectious diseases in Greece have substantially boosted high-quality research into virology. In this Special Issue, we will focus on state-of-the-art virus research in Greece, from virus molecular biology and pathogenesis to antiviral agents and therapy.

Dr. Ioannis Karakasiliotis

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
