

Special Issue

Emerging and Re-Emerging Viral Zoonoses

Message from the Guest Editors

This Special Issue of *Viruses* seeks to present cutting-edge research on emerging and re-emerging viral zoonoses from across a broad range of disciplines. We invite contributions that explore the following:

- **Epidemiology and outbreak investigations** in both endemic and non-endemic regions;
- **The viral evolution, genomics, and molecular characterization** of (re)emergent pathogens;
- **The ecology of zoonotic spillover** and the role of animal reservoirs, cross-species transmission and vectors;
- **The clinical features, disease progression, and long-term outcomes** in infected individuals;
- **Immunological responses and host-virus interactions**;
- **Novel diagnostic tools, therapeutics, and vaccine development**;
- **Public health strategies, surveillance systems, and pandemic preparedness**;
- **One Health approaches** integrating human, animal, and environmental health.

We look forward to receiving your valuable contributions to this timely and essential collection of research, which aims to deepen our understanding of and inform future responses to emerging zoonotic viral threats.

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
