Global Foot-and-Mouth Disease Control, Volume II

Message from the Guest Editor

We are pleased to announce the opening of the second volume of the [Global Foot-and-Mouth Disease Control](#) issue to submissions. Foot-and-mouth disease (FMD) is an infectious transboundary viral disease that has severe implications not only for the health and production of cloven-hoofed animals, including large and small ruminants and pigs, but also for the economy of the FMD-endemic countries. In this second volume of the Special Issue, we aim to widen our research to accept papers on all aspects of FMD research. Potential topics include, but are not limited to: viral pathogenesis, virus-host interactions, viral diagnosis and epidemiology, as well as vaccines/antivirals.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.
