

Topical Collection

Parvoviridae

Message from the Collection Editor

Viruses in the *Parvoviridae* family constitute a most diverse group and an ever-intriguing field of research. While all share an ssDNA genome and small dimensions, they can differ widely in structure, genome organization and expression, virus–cell interactions, host range, and impacts on hosts. Within the family, some viruses are human and veterinary pathogens; other viruses have long been studied and engineered as tools for oncolytic therapy, or as sophisticated gene delivery vectors, and can now display their wide and expanding applicative potential. This Topical Collection on ‘Parvoviridae’ continues the series of collections dedicated to viruses belonging to the *Parvoviridae* family. Evolution, structural biology, viral replication, virus–host interaction, pathogenesis and immunity, gene therapy, and viral oncotherapy are all topics of relevance to the community involved in parvovirus research and of interest to wider audiences, studies of which may be contributed to this collection.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
