Special Issue

Biosecurity and Plant Viruses: A Call to Action for a Sustainable Future

Message from the Guest Editors

The global food security landscape is evolving, facing challenges from climate change, population growth, and threats like novel plant viruses, which cause billions in economic losses annually. Biosecurity is increasingly critical for safeguarding agricultural productivity and food system health. This Special Issue explores the relationship between biosecurity and plant viruses, highlighting pressing issues and the need for international collaboration.

Topics include:

Emerging and Re-emerging Viruses: Research on genetic diversity, evolution, and detection strategies. Disease Surveillance: Development of monitoring programs using advanced technologies like genomics and Al.

Biosecurity Measures: Examination of practices such as quarantine and resistant crops.

Vector Management: Control methods for insect vectors transmitting plant viruses.

International Collaboration: Importance of global cooperation in combating threats.

We encourage submissions from researchers, policymakers, and industry leaders to contribute original research and reviews. This Special Issue aims to foster discussion and guide future efforts for sustainable agriculture.

Look forward to your submissions!

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
