Henipavirus Threats: From Hendra to Nipah

Message from the Guest Editors

Henipaviruses are zoonotic pathogens that are attracting increased attention, including two that cause severe disease in humans: Nipah and Hendra virus. Due to their potential to cause large outbreaks and the lack of effective countermeasures, it is essential that we continue to carry out research on these pathogens to explore new avenues and possibilities. In addition, other henipaviruses have been detected around the globe, with the potential to cross species barriers. This Special Issue will bring together recent advances, sharing updates from this exciting field of virology in the areas of pathogenesis, diagnosis, viral interactions, and vaccine/antiviral strategies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
