State-of-the-Art Bacteriophage Research in the Nordic Countries

Message from the Guest Editor

Bacteriophage research began more than a century ago and has contributed to our understanding of several aspects of biology. In the Nordic countries, phage research has a strong position, with the research topics varying from basic research such as phage genomics and structure analysis to applications such as phage display and phage therapy. This Special Issue will focus on different aspects of phage research carried out in the Nordic countries. We wish to present the Nordic phage research in its full scope, and welcome submissions from researchers working in the Nordic countries focusing on, but not limited to, phage genetics and evolution, phage structures, phage–host interactions, phage ecology, phage therapy and biocontrol, and phage display.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
