

Special Issue

Cytoskeleton in Virus Infections

Message from the Guest Editor

In this Special Issue of *Viruses*, our goal is to attract research articles that reflect the exciting advances that are currently taking place regarding the role and mechanism of viral manipulation of the cytoskeleton. Topics may include structural or biochemical insights into the interface of viral–cytoskeletal interactions, viral subversion of host signaling pathways that regulate aspects of the cytoskeleton, mechanisms of anterograde or retrograde transport of virus during replication, imaging of virus assembly and/or transport, and changes elicited by infection to cell behavior and cellular interactions that are underpinned by the cytoskeleton.

Guest Editor

Dr. Timothy P. Newsome

School of Life and Environmental Sciences, The University of Sydney, Sydney, Australia

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
