Special Issue

Cytoskeleton in Virus Infections

Message from the Guest Editor

In this Special Issue of *Viruses*, our goal is to attract research articles that reflect the exciting advances that are currently taking place regarding the role and mechanism of viral manipulation of the cytoskeleton. Topics may include structural or biochemical insights into the interface of viral–cytoskeletal interactions, viral subversion of host signaling pathways that regulate aspects of the cytoskeleton, mechanisms of anterograde or retrograde transport of virus during replication, imaging of virus assembly and/or transport, and changes elicited by infection to cell behavior and cellular interactions that are underpinned by the cytoskeleton.

Guest Editor

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
