

Special Issue

Virus Bioinformatics 2025

Message from the Guest Editors

This Special Issue is published alongside the International Virus Bioinformatics Meeting 2025 (<https://evbc.uni-jena.de/events/vibiom2025/>) taking place in Lisbon, Portugal May 13–15, 2025. ViBioM has become synonymous with scientific exchange and dialogue between different disciplines and attracts some of the most influential scientists in virus bioinformatics. This Special Issue will present original research articles and review papers covering recent advancements and current understanding of computational technology aspects of virology. Scientific results of interdisciplinary research are often difficult to publish in journals in either area. To facilitate publications in the field of virus bioinformatics, the European Virus Bioinformatics Center has been running this recurring special issue since 2019. We encourage you to publish your work in this Special Issue and present it at ViBioM 2025. However, this is not an obligation for publication.

Guest Editors

Prof. Dr. Manja Marz

Bioinformatics and High-Throughput Analysis and European Virus Bioinformatics Center, Friedrich Schiller University Jena, Jena, Germany

Dr. Paula Istvan

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
