Special Issue

6th Pan-American Dengue Research Network Meeting

Message from the Guest Editors

The Pan-American Dengue Research Network Meeting (http://www.pandenguenet.org) is an initiative to gather researchers across the Americas every two years to discuss their recent advancements in the field, communicate this information to the scientific community in the region, foster collaborations among groups, and discuss future research strategies that will further strengthen the field. During these meetings, cutting-edge topics on dengue field are presented and discussed. One of the main objectives of this application is to guarantee the participation of many graduate students and junior investigators from Latin American and Caribbean regions, which have been usually underrepresented in science. The scientific meeting to be held for the first time in the US and undoubtedly will make an important contribution to supporting and broadening the impact of research on dengue throughout the hemisphere. The collection of reviews and original research papers in this Special Issue is intended to summarize and showcase current research on arboviruses by investigators from throughout the Americas. Assoc. Prof. Nikolaos Vasilakis

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAq, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
