Diagnostic Virology during the COVID-19 Pandemic - Business as Usual

Message from the Guest Editor

We are interested in highlighting your work on other viruses during the COVID-19 pandemic, including how the pandemic may have impacted on these other virus infections in terms of diagnostics, surveillance, epidemiology, clinical management, infection control, etc. Has the pandemic changed and improved the way you address other viruses—or not—in the laboratory or wards, including infection control? Original papers, reviews and commentaries are welcome. Dr. Julian W. Tang

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
