

## Special Issue

# The Challenge of HIV Diversity

### Message from the Guest Editor

*Viruses* invites the submission of original research and review articles to this Special Issue, covering challenges in HIV diversity. The articles can cover any level of diversity, from inpatient immune evasion and development of drug resistance, to global challenges for vaccine design. Reports of research on HIV recombination at all levels, from inpatient to inter-subtype, are encouraged. Although HIV-1 M-group viruses comprise the majority of global AIDS cases, submissions if research on other immunodeficiency viruses is also encouraged. Topics of interest can include challenges in methods (challenges of amplifying and sequencing viral genomes, for example) and computation (challenges with multiple sequence alignment, phylogenetic analyses, recombination detection, etc.). Analyses of trends in drug resistance, immune evasion or epidemiology are well suited for this Special Issue. Although submissions should focus on immunodeficiency viruses, comparisons or contrasts to other viruses can be illuminating and useful.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

#### Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
