# **Special Issue**

# HIV Infection and Spread between T Cells

## Message from the Guest Editors

The aim of this Special Issue of *Viruses* is to provide an up-to-date view of HIV-1 infection and spread between CD4+ T cells, including new insights into the molecular and cellular biology of HIV-1 - T cell interactions, viral pathogenesis, immune evasion, and HIV-1 reservoirs/latency. We encourage the submission of all types of manuscripts (e.g., reviews, research articles, and short communications) pertaining to HIV-1 replication in T cells from in vitro and in vivo studies, including, but not limited to, the following topics:

- Cell biology of HIV-1 infection and replication in T cells
- Virus-host interactions that promote and/or restrict HIV-1 infection of T cells
- Innate immune sensing and evasion during HIV-1 infection of T cells
- New insights into HIV-1 cell-to-cell spread
- The establishment, maintenance and clearance of T cell reservoirs and latently infected cells.
- New experimental advances for studying HIV-1 infection T cells

### **Guest Editors**

Dr. Clare Jolly

Division of Infection and Immunity, University College London, Gower Street, London, UK

Dr. Philip Tedbury

Department of Pediatrics, Emory University School of Medicine, Atlanta

## Deadline for manuscript submissions

closed (22 December 2021)

## **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

#### **Editor-in-Chief**

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

## Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
