Special Issue

Seed-Borne and Seed-Transmitted Virus

Message from the Guest Editor

Seed-borne and seed-transmitted viruses account for about 25% of plant viruses, and with the extensive development of international trade, seed-borne viruses spread across borders and large areas, and may become new emerging outbreaks of disease, and some seed-borne viruses are plant quarantine pests. How to accurately and rapidly detect seed-borne viruses, understand the mechanism of seed-borne viruses, and how to effectively control seed-borne viral diseases are increasingly important concerns in agricultural production. In this Special Issue, we aim to collect papers regarding the above concerns from different countries and regions, as well as from different crops, providing a comprehensive platform for researchers to share their findings and advance the field of seed-borne and seed-transmitted virus management.

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAq, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
