Ocular Diseases in Viral Infection

Message from the Guest Editor

We are pleased to announce a call for papers for a forthcoming Special Issue of the journal "Viruses," dedicated to exploring the complex interplay between viral infections and ocular diseases. This Special Issue will compile a diverse collection of research, review articles, and original studies that illuminate the effects of various viral pathogens on ocular health. We are particularly interested in insights related to COVID-19 and retroviruses like HTLV-1 and HIV. Additionally, we welcome contributions that investigate ocular diseases caused by other viruses, such as adenoviruses, herpesviruses, and dengue virus, as well as chikungunya virus, and their impact on the eyes.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.
