

Special Issue

Mpox (Monkeypox): From Neglected Tropical Disease to Emerging Global Pathogen

Message from the Guest Editors

This Special Issue of *Viruses* will address a spectrum of topics on mpox and the MPXV including epidemiology, clinical features, molecular genetics, immunology, virology, diagnosis, treatment, prevention, and vaccination. Articles describing the MPXV in natural animal hosts and experiment animal models of infection are welcomed. Submissions which discuss the infection among special groups, including immunocompromised persons, pregnant persons, children, and commercial sex workers, and its association with sexual transmission are encouraged. Submissions can be in the form of original research articles, reviews, communications, viewpoints, case reports, and editorials. Illustrative and graphic materials including photographs are encouraged when possible.

Guest Editors

Dr. David A. Schwartz

Perinatal Pathology Consulting, Atlanta, GA, USA

Dr. Robert Colebunders

Global Health Institute, University of Antwerp, Antwerp, Belgium

Dr. Patrick Katoto

Centre for Tropical Diseases and Global Health, Catholic University of Bukavu, Bukavu, Democratic Republic of Congo

Deadline for manuscript submissions

1 March 2026

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
