

## Special Issue

# Human Adenovirus (HAdV) Infection in Children

### Message from the Guest Editors

Adenoviruses are common pediatric pathogens causing acute respiratory illness and gastroenteritis in children under 5 years of age and are also associated with disseminated infection and disease in pediatric transplant recipients and other immunocompromised patients. In this Special Issue, we would like to showcase epidemiology studies, case reports of unusual clinical presentations and courses of disease, descriptions of novel adenoviruses detected in cases of pediatric infection, nosocomial outbreaks in neonatal or pediatric wards, and relevant studies of novel prophylactic and therapeutic intervention strategies. We welcome all paper formats, including short and regular original articles and reviews.

### Guest Editors

Prof. Dr. Adriana Kajon

Lovelace Biomedical Research Institute, Albuquerque, NM 87108, USA

Prof. Dr. Glen R. Nemerow

Scripps Research Institute, Department of Microbiology and Immunology, San Diego, CA, USA

### Deadline for manuscript submissions

31 July 2026

## About the Journal

### Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

#### Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
