Human Adenovirus (HAdV) Infection in Children

Message from the Guest Editors

Adenoviruses are common pediatric pathogens causing acute respiratory illness and gastroenteritis in children under 5 years of age and are also associated with disseminated infection and disease in pediatric transplant recipients and other immunocompromised patients. In this Special Issue, we would like to showcase epidemiology studies, case reports of unusual clinical presentations and courses of disease, descriptions of novel adenoviruses detected in cases of pediatric infection, nosocomial outbreaks in neonatal or pediatric wards, and relevant studies of novel prophylactic and therapeutic intervention strategies. We welcome all paper formats, including short and regular original articles and reviews.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
