

Special Issue

Genetic and Epigenetic Regulation of Virus–Host Interaction

Message from the Guest Editor

This Special Issue will delve into the dynamic interplay between viruses and host cells, focusing on the crucial roles that genetic and epigenetic mechanisms play in viral replication and immune evasion. As research progresses, we increasingly recognize the importance of host gene expression and regulation in the viral lifecycle. The issue will explore how changes in the host epigenome facilitate viral strategies for immune evasion and the role of host genetic factors in susceptibility to infections. Key topics will include viral manipulation of the host epigenetic landscape for replication and the post-translational modifications of proteins involved in antiviral defenses. We invite original research, reviews, and perspectives from virologists, epigeneticists, and molecular biologists to advance our understanding in this field. By elucidating these regulatory mechanisms, we aim to uncover novel strategies for antiviral drug development and disease management. We look forward to your valuable submissions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
