

Special Issue

Advances in Rabies Research 2023

Message from the Guest Editors

The Special Issue is associated with the conference “XXXIII Rabies In The Americas” (RITA) international conference, which will now be taking place in Bogota, Colombia, in October 2023, as an on-site event. RITA is a conference that has been held every year since 1990 by the United States of America, Canada, and Mexico, and more recently by Brazil and Argentina, as well as other Latin American countries; it aims to connect researchers, national and local directors of programs, laboratory workers and all those in the Americas and in other parts of the world who are involved in the surveillance, prevention and control of Rabies. RITA conferences are events strictly centered on all aspects of rabies research and provide excellent opportunities to focus on research topics in this area. Symposium participants, as well as all researchers working in the field, are cordially invited to contribute original research papers or propose reviews to this Special Issue of *Viruses*. For further information, visit the dedicated website: <https://www.rabiesintheamericas.org/>.

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
