

Special Issue

Structural Variations and Molecular Genetics of Hepatitis Virus and Related Viruses

Message from the Guest Editor

In this Special Issue, we would like to explore genetic changes in hepatitis virus in-depth. Along with research articles and reviews of mutations, recombinations, and SVs in hepatitis virus, analyses on HBV integration in the host genome are welcomed, as are analyses on SVs in the host genome. This Special Issue also covers research on bioinformatical techniques for the analysis of genetic alterations in hepatitis virus and experimental data on genetic alterations in hepatitis virus.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
