

## Special Issue

# The Added Role of Phylogenetics in the Prevention of HIV-1 and Related Viral Diseases

### Message from the Guest Editor

Despite remarkable advances in the Fast-Track "90-90-90" treatment-as-prevention initiative, global HIV epidemic remain elusive with 1.5 million new infections annually over the last decade. Molecular phylogenetics is an exciting new direction to delineate the structure of transmission networks at an unprecedented detail, providing novel insights into regional epidemic drivers. With this Special Issue, we wish to explore precisely what phylogenetics adds to the prevention of HIV-1 and related viral diseases. We welcome articles that describe phylogenetic insights into specific issues, including:

- Challenges in the identification of cluster types based on selected methodologies and genetic cut-offs.
- Epidemiological and virological predictors of the genesis and expansion of clustered outbreaks.
- The influence of migration and globalization in emerging patterns of viral spread.
- The mixing of epidemics among key vulnerable populations.
- The evolution of viral epidemics in the era of highly potent therapy, 90-90-90 Fast Track targets and COVID-19.
- Addressing ethical challenges in the implementation of phylogenetic strategies.

### Guest Editor

Prof. Dr. Bluma G. Brenner

McGill AIDS Centre, McGill University, Montreal, QC H3A 0G4, Canada

### Deadline for manuscript submissions

closed (10 August 2023)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,  
National Cancer Institute, Frederick, MD 21702-1201, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

#### Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
