Special Issue

Arbovirus Epidemiology & Control

Message from the Guest Editor

Arboviruses are viruses transmitted through the bite of arthropods. Clinically important arboviruses include those from the Flavivirus, Alphavirus, Banyangvirus and Orbivirus genus. Together, they comprise some of the fastest-spreading pathogens today. There are no specific antivirals for arboviruses, so treatment is usually only carried out to alleviate symptoms. Thus, emphasis is placed on prevention; several arboviruses have vaccines, and several more are currently being developed. We particularly encourage submissions pertaining to arbovirus vaccine development. At the time of announcement of this Special Issue, there are outbreaks of Crimean-Congo Hemorrhagic Fever in Iraq, Dengue in Sao Tome and Principe, and Japanese Encephalitis in Australia. We also encourage submissions describing new insights into contemporary arbovirus outbreaks. As ever. Viruses remains open to submissions on the basic biology of arboviruses as well. It is our hope that this Special Issue will provide a hub of cutting-edge developments in this broad and growing field.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
