Special Issue

Baculovirus Advances and Applications

Message from the Guest Editors

It is now more than 30 years since the use of baculoviruses as expression vectors was first described. Since then, many hundreds, if not thousands, of genes have been expressed in insect cells using the baculovirus system. Advances have been made to enable multiple genes to be expressed that can assemble into protein complexes including virus-like particles. High yields of quality proteins including those targeted to membranes or for secretion can be attained. The vectors have also been modified to facilitate gene expression in mammalian and human cells. These developments have enabled the insect expression system to be at the forefront of developments to produce new vaccines for human and animal health, and as a vector for the delivery of genes into human tissue. It is these developments that form the focus of this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
