Special Issue

Viral Infections in Companion Animals: Volume 2

Message from the Guest Editors

Dogs and cats are common companion animals, but horses, donkeys, and exotic pets also share our lives. Companion animals are often our best friends, and there is abundant evidence that interactions between humans and their pets afford improved well-being and health advantages. Viral infections can seriously impact companion animals' health and life expectancy, which has direct importance for their owners. Viruses with zoonotic potential are of great importance in a One Health context, including SARS-CoV-2, which infects companion animals via close contact with humans. Finally, the novel emerging viruses feline gammaherpesvirus and morbillivirus require investigation. Thus, increased knowledge on the pathogenesis, diagnosis, prevention, and control of viral infections in companion animals is of outstanding importance. Submissions are invited from researchers studying viral infections in companion animals. Studies presented during the 2022 symposium of the International Society for Companion Animals (ISCAID) that will be held in Glasgow, Scotland are particularly welcome.

Guest Editors

Prof. Dr. Regina Hofmann-Lehmann

Clinical Laboratory, Depertment for Clinical Diangostics and Services, Vetsuisse Faculty, University of Zurich, Zurich, Switzerland

Prof. Dr. Margaret Hosie

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
