COVID-19 and Cardiac Injury

Message from the Guest Editors

The novel SARS coronavirus 2 (SARS-CoV-2), the causative agent of coronavirus disease 2019 (COVID-19), has caused an unprecedented pandemic worldwide. The cardiovascular system is one of the major systems affected by the viral infection. Indeed, infected patients may develop several cardiovascular complications which are associated with poor outcomes. Similarly, the presence of pre-existing cardiac disease increases mortality in COVID-19 patients. In this Special Issue, entitled “COVID-19 and Cardiac Injury”, we aim to present research and theoretical papers addressing all these questions and many other related to the interaction between COVID-19 infection and cardiac injuries. Thus, we invite colleagues working and/or involved in any field related to COVID-19 and cardiac disease to submit their work for publication in this Special Issue. We believe that this Special Issue will not only be very timely but also scientifically innovative and exciting.

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
