

Special Issue

Cyanophage and Algal Virus

Message from the Guest Editor

Today, in the age of omics, a wealth of evidence points to the remarkable distribution and diversity of cyanophages and algal viruses across the globe. Efforts to identify these viruses and study their biology, genomics, ecology, and evolution through innovative approaches will open new windows for advances in this field. In this Special Issue, we aim to compile the latest research on aquatic viruses, with a particular focus on cyanophages and algal viruses. We welcome the submission of original research and review articles that cover different topics, including the description of new viruses, elucidation of virion structure, genomics and evolutionary aspects of aquatic viruses, viral ecology, and the impact of these viruses in different environments. We strive to present a comprehensive collection of up-to-date research in this broad and fascinating field of virology.

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
