7th Pan-American Dengue Research Network Meeting: Lima 2020

Message from the Guest Editors

PanDengue Net is a non-profit initiative that gathers scientists, researchers, and medical professionals working in the field of arbovirology across the Americas (<http://www.pandenguenet.org>). The PanDengue Net meeting, which is an event scheduled every two years, brings these researchers together in the context of a 4-day scientific gathering. The meeting allows for the presentation and discussion of recent advances in the field. The main focus is on Dengue, Zika, Chikungunya, and other arboviruses of medical relevance that severely impact public health in the Americas and around the world. As in previous meetings (2008 Recife, Brazil; 2010 Cancun, Mexico; 2012 Cartagena, Colombia; 2014 Belém, Brazil; 2016 Panama City, Panama; and 2018 Galveston, Texas, USA), the Lima meeting will include pre-eminent scientists from a wide range of fields, including vaccine development, vector research and control, molecular epidemiology, diagnostics, antivirals, viral structure and pathogenesis, and viral immunology.

Guest Editors

Dr. Carlos A. Sariol

Dr. Mariana Leguia

Dr. Daniela Weiskopf

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
