

## Special Issue

# MicroRNAs and Other Small RNAs in Viral Infections

### Message from the Guest Editors

microRNAs (miRNAs) and other small RNAs are involved in regulating several disease processes, including viral infections and host response. For example, miRNAs may restrict viral replication by downregulating viral RNAs or cellular cofactors or enhance it by downmodulating host restriction factors. Small RNAs processed from host or viral RNAs may act to stabilize viral RNA structure or to enforce viral latency in the nucleus. Outside the cell, small RNAs from miRNAs to degradome products may betray the presence of viral infection or be shuttled between cells in extracellular vesicles. This Special Issue examines current knowledge and new developments in the study of small RNAs and viruses.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,  
National Cancer Institute, Frederick, MD 21702-1201, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

#### Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
