Viral Entry Pathways

Message from the Guest Editors

Viral entry is the first step of infection in the viral life cycle and an important antiviral target. This process is initiated by specific interactions between a virus protein(s) with host factors on the host cells, and followed by diverse pathways such as endocytosis, membrane fusion, and/or viral penetration to enter the target cells. Recent work using an integral approach of cell biology studies, live-cell imaging, structural biology, and systems biology has provided new insights into the multiple and subtly different pathways that viruses use to enter host cells.

In this Special Issue, we welcome submissions of research or review articles on recent advances in our understanding of viral entry pathways. Topics may include but are not limited to the cell and molecular biology of viral entry, virus–host interactions, cellular receptors, viral structures, and antivirals of both DNA and RNA viruses.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2026).
