Structure-Function Relationships in Viral Polymerases

Message from the Guest Editor

Dear Colleague, Over the past decade our structural biology knowledge of viral polymerases and the detailed molecular interactions involved in viral genome replication has increased dramatically. We are well poised for a global comparison of these structures that highlights both commonalities among and within virus families and the unique and important aspects of individual structures. Thus, this Special Issue of *Viruses* is focused on viral polymerase structures and our understanding of their molecular mechanisms. This issue will be accompanied by an extensive collection of on-line materials in the form of movies that illustrate key elements of individual polymerase structures and comparisons of multiple structures. Guidelines for manuscript submission are shown below and authors specifically interested in partaking in the multimedia aspects of this Special Issue should contact the guest editor directly (Olve.Peersen@ColoState.edu) for initial guidance about manuscript sections and organization.

Guest Editor

Dr. Olve Peersen

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
