

Special Issue

Viral Recombination: Ecology, Evolution and Pathogenesis

Message from the Guest Editor

Viral recombination is a central aspect of virus ecology, evolution and pathogenesis. This special issue of *Viruses* is dedicated to explore and discuss aspects of viral recombination. We hope to assemble a collection of research papers and reviews that together will offer a comprehensive view on this rapidly developing field, which reflects our current understanding, and looks toward the future. Topics may include recombination mechanisms, evolutionary aspects of recombination, gene acquisition, emergence of novel viruses, recombination in the development of antigenic variation, and viral replication. Dr. Ken Stedman

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
