Virology Research in Taiwan

Message from the Guest Editors

Taiwan has experienced several viral epidemics and outbreaks over the past few decades, including enteric viruses, dengue virus, hepatitis viruses, influenza viruses, and rabies virus, and has faced both SARS and COVID-19 pandemics. These viral diseases are of clinical importance to the Taiwanese population. Taiwan's agriculture is also at risk of important animal and plant viruses that affect livestock, crops, and aquaculture and has observed continuous research efforts in these areas as well. At the same time, emerging research in Taiwan has seen the development of viruses in cancer therapy (e.g., oncolytic viruses) and biotechnology applications (e.g., phage display). This Special Issue covers all aspects of virology research in Taiwan and we invite researchers in Taiwan to submit to this Special Issue.

Guest Editors

Prof. Dr. Liang-Tzung Lin

Department of Microbiology and Immunology, Taipei Medical University, Taipei, Taiwan

Prof. Dr. Ya-Chung Tian

Department of Nephrology, Chang Gung Memorial Hospital, Linkou Main Branch, Taoyuan City, Taiwan

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
