

Special Issue

Virus Bioinformatics 2022

Message from the Guest Editors

This Special Issue is published alongside the International Virus Bioinformatics Meeting 2022 (ViBioM 2022) taking place in spring 2022 in Valencia, Spain.

This Special Issue will present articles covering computational approaches in virology, and we welcome any contribution within this cross-disciplinary field. Sub-topics may include (but are not limited to): systems virology, virus–host interactions, viral infections and immunology, virus evolution and classification, epidemiology and surveillance, viral metagenomics and ecology, and clinical bioinformatics. We welcome original research articles and review papers dealing with the recent advancements and current understanding of computational technologies aspects of virology. We encourage you to publish your work in this Special Issue and present it at ViBioM 2022. However, this is not an obligation for publication. All papers should be submitted online

at <https://www.mdpi.com/journal/viruses>. Please select the correct Special Issue when submitting your paper to *Viruses*.

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,
National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
