

## Special Issue

# Virus Bioinformatics 2024

### Message from the Guest Editors

This Special Issue is published alongside the International Virus Bioinformatics Meeting 2024 (<https://evbc.uni-jena.de/events/vibiom2024/>), taking place in Leuven, Belgium, on 28–30 May, 2024. ViBioM has become synonymous with scientific exchange and dialogue between different disciplines, and attracts some of the most influential scientists in virus bioinformatics. This Special Issue presents original research articles and review papers covering the recent advancements and our current understanding of the computational technological aspects of virology. Scientific results of interdisciplinary research are often difficult to publish in journals in either area. To facilitate publications in the field of virus bioinformatics, the European Virus Bioinformatics Center has been running this recurring Special Issue since 2019. We encourage you to publish your work in this Special Issue and present it at ViBioM 2024. However, this is not an obligation for publication. All papers should be submitted online at <https://www.mdpi.com/journal/viruses>. Please select the correct Special Issue when submitting your paper to *Viruses*.

### Guest Editors

Prof. Dr. Manja Marz

Bioinformatics and High-Throughput Analysis and European Virus Bioinformatics Center, Friedrich Schiller University Jena, Jena, Germany

Dr. Franziska Hufsky

The European Virus Bioinformatics Center, Friedrich Schiller University Jena, Jena, Germany

### Deadline for manuscript submissions

closed (31 December 2024)

## About the Journal

### Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

---

### Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research,  
National Cancer Institute, Frederick, MD 21702-1201, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Infectious Diseases)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
